How the Pyther Innovations is better than other development firms

Other Firms	Pyther Innovations
Lack of clear business requirement	We had a team of Business Analyst who can co-ordinate with stack-holder for their requirements. Analyst will prepared the complete functional requirement document and take approval with stack-holder and then proceed with next phase of development.
Difficulty in time estimation and cost estimation	We had a team of expert people who estimated the timeline for the requirement i.e. stack-holder will get the release on time. The accuracy of time estimation is 98%. The price will be the best in compare to market rate.
Dependance on specific technologies	Our company CTO has a vast experience, 19+ years in the field of ITES. He is professional trainer who can train entire team with emerging technologies.
Difficulty in finding and retaining skilled developers	We have in-house experienced trainer, so entire team groom with latest technologies. Our entire team is full of skilled.
Inadequate testing	Experienced testing team who follow complete STLC and provide quality assurance for the developed product.

Pyther Innovations

We, create VALUE for your BUSINESS
